

ARTIFICIAL BREEDING INDUSTRY AREA MANAGER

21st Century Genetics P/L

Western Victoria / SE South Australia

21st Century Genetics are Australia's 'Dairy Genetics pacesetters'. We provide Australian farmers with the most diverse range of high quality proven sires from seven different countries. We are in search of 'the best in the business' to continue our market share growth development, in Western Victoria and the Mt Gambier region.

The successful applicants role will include:

SALES

A priority within this important role is definitely sales. Included will be on-farm and herd inspection, together with developing a close working relationship with the established reseller network.

ALTAMATE

Part of your role will include on-farm herd evaluation/assessment responsibilities, working with AltaMate.

We require a person with the rare combination of cow sense, breed knowledge and people skills together with a natural sales and marketing ability.

Other responsibilities will include:

Budget implementation and management, young sire selection and progeny test program growth.

Excellent communication and computer skills are necessary. Some interstate and overseas travel will be required.

An excellent salary package is offered. All applications will receive 100% confidentiality. Applications close **December 15, 2008** to –

Daryl Brown, Manager, 21st Century Genetics
